

# Accessibility Audit (WCAG) — MediFollow

**Project:** MediFollow — Patient follow-up platform (CHU Abdelhamid Ben Badis)

**Stack:** React 18 + Vite 5 + Bootstrap 5 (xray theme) + NestJS

**Analyzed URL:** <https://medifollow-frontend.vercel.app/>

**Report date:** April 29, 2026

**Author:** CodeCraft Team

## Executive summary — Automated scans (achecker.ca)

This report documents an **automated first pass** using **achecker.ca**. **Automated scans alone do not prove legal WCAG conformance** — human review remains required.

Response Time: 715ms

Detailed metrics are in the summary table below.

### Summary table

| Metric                     | WCAG <b>Level A</b> (after fixes) | WCAG <b>Level AA</b>      |
|----------------------------|-----------------------------------|---------------------------|
| <b>Accessibility score</b> | <b>96 / 100</b> (best run)        | <b>89 / 100</b> (example) |
| <b>Errors</b>              | <b>0</b>                          | <b>2</b>                  |
| <b>Warnings</b>            | <b>3</b>                          | <b>4</b>                  |
| <b>Notices</b>             | <b>0</b>                          | <b>0</b>                  |
| <b>Tests passed</b>        | <b>28 / 32</b>                    | <b>32 / 38</b>            |
| <b>Page title</b>          | MediFollow   React                | Same                      |

**Brief interpretation:** **Level A** shows a strong result after fixing the footer link (WCAG 1.4.1). **Level AA** adds stricter rules — hence additional errors and warnings to address separately.

## 1. Context and scope

**Objective:** document compliance target (**A / AA**), list automated findings, and record **corrective measures** in code.

- **In scope:** public landing and `LandingShell` wrapper (navbar, footer).
- **Out of scope:** full authenticated application (to be audited on critical routes).

### Recommended tools (assignment brief)

| Tool                                       | Role                  |
|--------------------------------------------|-----------------------|
| achecker.ca                                | Quick scan, score     |
| <b>axe DevTools</b>                        | Detailed DOM analysis |
| <b>WAVE</b>                                | Visual highlighting   |
| <b>Lighthouse</b> (Accessibility category) | Lab audit             |

## 2. Methodology

1. URL: `https://medifollow-frontend.vercel.app/`
2. **Level A** and **Level AA** configurations on achecker.ca, desktop view.
3. Known issue fixed: text link “MediFollow” (footer) — distinguished only by color (**1.4.1**).

---

### 3. WCAG levels (reference)

---

| Level      | Typical use                          |
|------------|--------------------------------------|
| <b>A</b>   | Minimum baseline                     |
| <b>AA</b>  | Common target (contrast 1.4.3, etc.) |
| <b>AAA</b> | Rarely required                      |

**Declared status (automated only):** **Level A** is favorable on the best scan; **Level AA** — address remaining errors and follow up with manual review.

---

### 4. Issue addressed — “MediFollow” link (copyright)

---

| Field          | Detail                                                                                                                                                              |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Symptom</b> | Link not distinguishable without color ( <code>text-decoration-none</code> + <code>text-primary</code> ).                                                           |
| <b>WCAG</b>    | <b>1.4.1 Use of Color</b> (A).                                                                                                                                      |
| <b>Fix</b>     | Class <code>landing-footer-home-link</code> + CSS in <code>public/hospital/css/style.css</code> : underline <code>!important</code> , <code>:focus-visible</code> . |
| <b>Files</b>   | <code>Front_End/CODE-REACT/src/components/landing/LandingShell.jsx</code> ,<br><code>public/hospital/css/style.css</code> .                                         |

---

### 5. Remaining items (AA) and next steps

---

| Priority  | Action                                                             |
|-----------|--------------------------------------------------------------------|
| <b>P0</b> | Fix the <b>2 errors</b> listed in the <b>AA</b> scan (Issues tab). |
| <b>P1</b> | Address <b>warnings</b> or document false positives.               |
| <b>P2</b> | Full keyboard pass; NVDA / VoiceOver on a sample.                  |
